

Rainbow Classroom by Alcatel-Lucent Enterprise eCatalogue

November 2022 edition 03

Overview

Rainbow Classroom

Creating a collaborative learning experience anywhere

Rainbow Classroom is a European-hosted and developed remote learning platform designed with teachers for teachers.

It delivers active, impactful learning to your learning community, both remotely and on-premises simultaneously.

The main driver is to empower teachers and trainers to focus on teaching rather than the technology via an intuitive and powerful interface.

Students are able to reach their full potential and perform to the best of their ability thanks to a streamlined and active learning environment.

This results in a very enjoyable, highly effective and collaborative learning experience for everyone involved.

Summary

Rainbow Classroom

Creating a collaborative learning experience anywhere

- **Environment:** choose the environment which fits the type of organization you are going to use Rainbow Classroom in.
- **Deployment:** choose which way you want Rainbow Classroom to be deployed – via LMS integration if you are already using or plan to use a learning management system or standalone if you are only looking for a remote learning platform.

Native integration

Creating a collaborative learning experience anywhere

- Take full control of your classroom environment by either setting up rules and restriction beforehand or during your session

- The Single-Sign-On technology ensures a seamless user experience from login to logout

- Leverage Rainbow Classroom embedded communications and collaboration capabilities launched directly from your learning management system or use the standalone version if you don't have one

Fully secured

- All sessions are fully encrypted and secured
- SSO to launch Rainbow Classroom from your LMS
- ISO 27001 certified

Full control of the platform

- Set permissions for the virtual classroom and students alike
- Protect your classroom, add co-hosts, plan or organize sessions on the fly

Analytics & Reporting

- In-depth analytics of student behavior and attendance
- Evaluate activity
- Export reports to save or share

Intuitive interface

- Simple to use and deploy
- Rainbow Classroom is launched directly from your LMS if you use one
- You need only a browser

For education

At a glance

Extend

Engage

Educate

- Rainbow Classroom seamlessly extends the physical classroom to an active, collaborative learning environment, both online and hybrid.
- Creates a closer personal interaction between teacher and student which improves the participation experience and helps students reach their potential.
- Results in a more effective learning experience, for students to perform at the best of their ability

For teachers and students across the globe

Rapid learning curve

- No class down-time or on-boarding because of native integration and access through existing known software
- Fast roll-out and deployment

Highest security standards

- Teacher and student privacy are protected by best-in-class encryption mechanisms
- ISO 27001 certified

Transparent subscription model

- Subscriptions are priced per teacher per month
- Student licenses are free of charge
- Very competitive pricing

For enterprises

At a glance

Engage

Educate

Collaborate

- Rainbow Classroom is a European, cloud-based platform that extends your passive, on-demand training to an active, collaborative learning environment, whether online or hybrid.
- It creates a closer personal interaction between coach/trainer and attendees as well as powering the collaboration between attendees. The persistent engagement improves the participation experience.
- This leads to a more effective training experience, a more valuable workforce and a better use of the time and resources invested.

Enterprise-grade remote coaching platform

Full service-continuity

- Equip your employees with the tools they need to infallibly host and join trainings whenever they need to and wherever they are

Seamless integration

- Rainbow Classroom easily blends in with your existing business processes and applications, but can also serve as a standalone platform

Unlimited scalability

- Scale up or down based on your current company requirements with monthly subscriptions

Transparent subscription model

- Subscriptions are priced per trainer per month
- Trainee licenses are free of charge

LMS integration

Powerful
integration

Automatically
synchronized
class data

Full
Classroom
Control

Enrich your
existing
learning
management
system

- Launch Rainbow Classroom directly from your LMS and discover how you can benefit from natively embedded collaboration and communication capabilities

- Benefit from a closed learning environment with no unauthorized access – teachers and administrators must invite students to join a class

- Existing data from your LMS is automatically synchronized and transferred to Rainbow Classroom when creating a class, adding students or starting your virtual classroom

- Rainbow Classroom can connect to any learning management system with an LTI standard interface

LMS Integrations

At a glance

Rainbow Classroom currently supports integration into one of the two following learning management systems

- Please note that a **standalone version** of Rainbow Classroom exists. If you are **not using** or do not intend to use a **learning management system** Rainbow Classroom can also be used **without one**.

Standalone

Built-in LMS features

Centralized Controls

Advanced Analytics & KPIs

Deliver first-class training from anywhere to anywhere in the world

- Manage both classes and students from within Rainbow Classroom using the built-in learning management system

- Achieve excellency with the in-depth analytics dashboard provided by Rainbow Classroom, offering detailed insight into attendance, activity and behavior

- Thanks to the unique and intuitive user experience teachers and administrators can manage system, class and user information from a single interface

- A fully autonomous, intelligent and comprehensive teaching platform to drive and nurture student success via planned or ad-hoc coachings and trainings
